

FOOD WASTE RECYCLING PROGRAMS THROUGHOUT THE COUNTRY

We recycle food waste to produce a high-quality animal feed, and fertilizer promoting a true circular economy.

We are committed to building long-term partnerships with quality, safety, integrity, performance, and customer satisfaction at our core. We offer turnkey Food Waste Recycling solutions that provide 100% compliance to all mandated legislation leaving you more time to focus on growing your business.

Our Forager's Feed Sustainable Protein products are currently available on Chewy.com and Amazon.com. Any of our animal feed products can be Private Labeled for our grocery partners for them to sell in their stores thereby providing and establishing a complete circular recycling program that can be promoted to their customers.

DOG TREATS

CHICKEN FEED (BLACK SOLDIER FLY LARVAE)

THE PROCESS

NexCycle is equipped with the assets to serve as the single vendor for all your **recycling, collection, certified destruction, and de-packaging needs**. We can process up to 500 tons of food waste per day at our industrial processing facility. Our on-site services include consultation, waste stream management, and training. We also provide collection and transportation of all food waste products to our transfer yards where the waste is processed and the recycled material is made available for reuse in the form of agricultural products, animal feed, bio fuel, and landscape materials.

LEADING THE FUTURE OF SUSTAINABLE PROTEIN

Black Soldier Fly Technology (BSF)

Using proprietary technology, we are able to harness the natural life cycle of the Black Soldier Fly and produce sustainable protein for animal feed in a closed-loop cycle. These insects play an important role in the future of sustainability as they convert pre-consumer food waste, reducing the amount of harmful gases emitted into the atmosphere. Our mission is to provide high-quality nutritious feed for poultry, fish, dogs and other animals, forever changing the way we think about protein.

OUR COMMITMENT AND FOCUS TO ESG

Eliminating Impact

Eliminating food waste and curbing greenhouse gas emissions.

Social Impact

Sustainable waste reduction and production of sustainable ingredients to address protein shortfall & unsustainable agricultural practices.

Governance

Meeting sustainability goals and getting ahead of growing regulatory pressures to curb organic wastes and reduce greenhouse gas emissions.
